

Air Quality Protocol

UYSA is committed to providing a safe environment for all of our players, coaches, spectators, referees at games and practices. There are so many different news and reporting sites that report on our Air Quality. After further review, UYSA has found a reliable site that we will be using to monitor the air quality.

The primary monitor is **Purple Air**. **Purple Air** reports directly from the Environmental Protection Agency. To reschedule your game due to air quality you *must* use the **Purple Air** reporting.

How To Reschedule Your League Game Due Air Quality Reporting

- Games may be cancelled up to 3 hours prior to kick off time based on the air quality reporting.
 - Games will not be cancelled if the air quality reporting is not reflecting **RED**
- If the air quality index is reflecting **RED** you **MUST** take a screen shot of the air quality report from **Purple Air** and submit it via email to UYSA Scheduler with the game number. SCHEDULER@UTAHYOUTHSOCCER.NET
 -

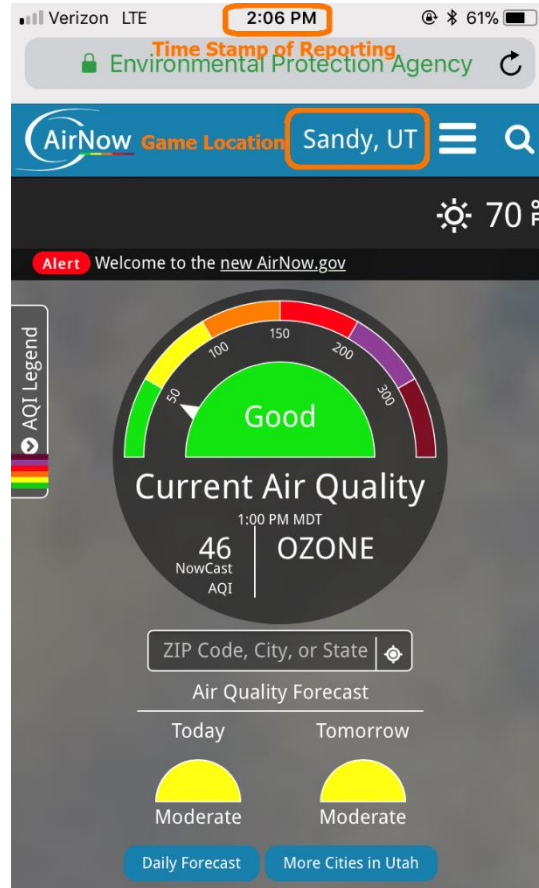

EX: The air quality screen shot must include the location of the game and show the time stamp from your computer or phone.

Computer Example

Phone Example

- The home team is responsible for contacting the opposing team, the field assignor and the referee assignor to notify them that the game has been cancelled due to the air quality.
 - **If the referee assignor is not notified of this game cancellation, the home team will be charged a referee fee for this game.**
- The home team is responsible for rescheduling the game (following the weather related reschedule process)
- Game reschedules due to air quality must be rescheduled no more than 15 days from the original scheduled time.
